Benefits

Support expansion - This solution provides real-time data anywhere, anytime. You can easily add users to accommodate business changes, making it easier to launch and expand to new locations.

Realize a speedier time to value - You can deploy or upgrade industry - leading business processes, templates, training materials, tools and simulations in just weeks or months with minimal upfront investment.

Reduce total cost of ownership - Say goodbye to expensive servers and hardware from your office and redirect staff to more strategic tasks by developing to the cloud.

Ensure security and reliability - You get best-in-class security for your data as well as comprehensive monitoring on a high secure infrastructure. Infor Syteline Rental ERP has a 99.9% historical uptime and has seen roughly 1.9 million failed attacks quarterly. You'll get more reliability, uptime and security than most companies alone.
