Infor® SyteLine Construction ERP

Infor® SyteLine Construction ERP is a robust, end-to-end ERP system developed specifically for the construction industry.

Designed for construction and engineering businesses, this ERP features a comprehensive suite of CRM, sales, project management, bid management, inventory, and enterprise financial management all wrapped in a modern, clean, simple to understand user experience.

Dashboards/analytics drive differentiation and take your business to the next level. Fully configurable to meet individual needs and/or integrate seamlessly with any third-party applications.

Available in the cloud, hosted, or on-premise.

Benefits

➢ **Support expansion** - This solution provides real-time data anywhere, anytime. You can easily add users to accommodate business changes, making it easier to launch and expand to new locations.

➢ **Realize a speedier time to value** - You can deploy or upgrade industry-leading business processes, templates, training materials, tools and simulations in just weeks or months with minimal upfront investment.

➢ **Reduce total cost of ownership** - Say goodbye to expensive servers and hardware from your office and redirect staff to more strategic tasks by deploying to the cloud.

➢ **Ensure security and reliability** - You get best-in-class security for your data as well as comprehensive monitoring on a highly secure infrastructure. SyteLine Construction ERP has a 99.9% historical uptime and has seen roughly 1.9 million failed attacks quarterly. You'll get more reliability, uptime and security than most companies alone.
